

IT Partnership Plan

Flat Rate

Web & marketing solutions

After 8 years of continuous growth
in Spain and across the world,
we are still offering
our clients and partners our
Flat Rate service.

Here's why...

Through our experience, we have discovered that
our clients lose between

25% and 30%

of the time spent on a project in management:

*analysing prices and costs, comparing budgets,
submitting and
adjusting proposals, revising terms and conditions
and monitoring their
compliance, negotiating, billing, payment
management and notifications, etc.*

Your business benefits and grows.

- ✓ You focus solely on production.
- ✓ You have an assigned team that is available at all times to assist your business and prioritise tasks.
- ✓ You save on time and resources. For the same cost as a single professional on staff, you'll have 5 at your disposal.
- ✓ You maximise the speed of developing your products since your technological partner specialises qualitatively in your core business.
- ✓ You manage and maintain digital products that are more flexible, thus improving the chances of success when working dynamically.

Our plans
